

## Tool Setter Plate

P/N 8702

### About the Tool Setter Plate

Our tool setter plate is a generic tool setter that we offer for our Accu-Pro mill.

The tool setter comes with the proper cable connections to connect to the MASSO Touch control. These are bullet connectors. One is male and the other is female (so they cannot be incorrectly connected).

1. There are two black cables coming out of the rear of the Touch control (see Figure 1).

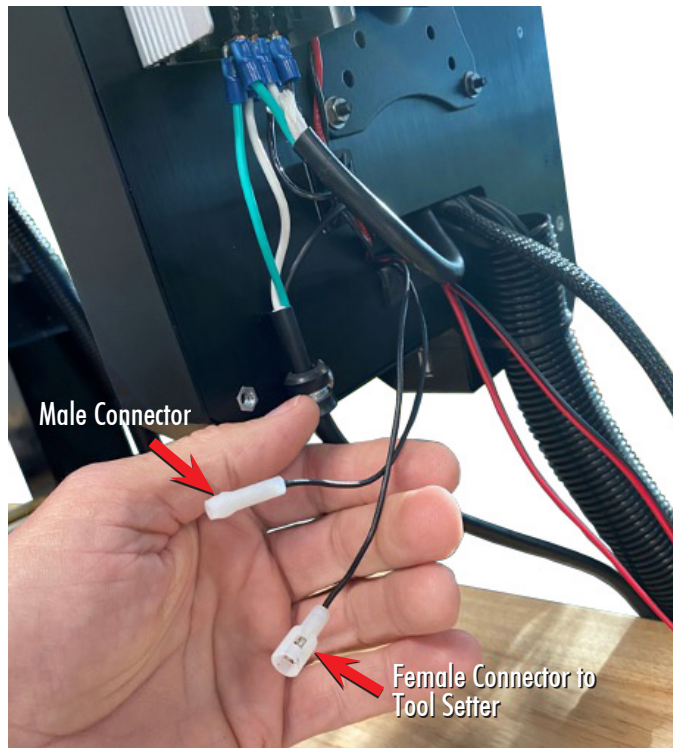

FIGURE 1

Connect the ground cable (with the alligator clip) to the male connector cable and the tool setter cable to the female connector cable.

2. Clip the ground alligator clip onto the top end of the spindle (see Figure 2).

3. Place the tool setter on the tooling plate close to the X/Y-axis home position (see Figure 2).

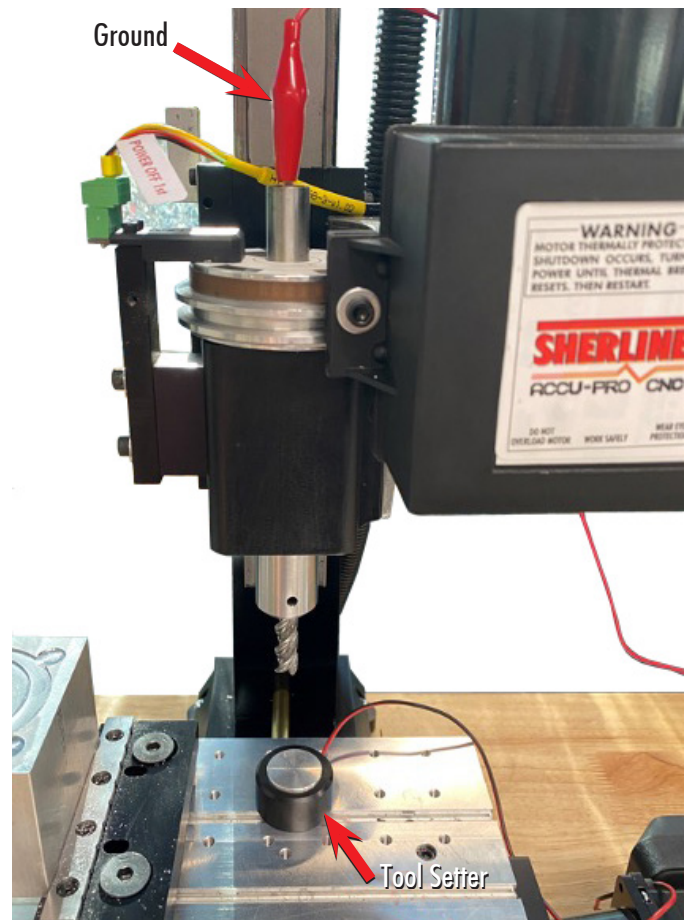

FIGURE 2

4. Watch this video to see how to set up and use the tool setter: [Accu-Pro VMC Mill - Using a Tool Setter and Tool Setting Commands](https://youtu.be/_yWKT7V_K8k) (YouTube: [https://youtu.be/\\_yWKT7V\\_K8k](https://youtu.be/_yWKT7V_K8k))
